Summary

Miracles Fertility & IVF Clinic is an ICMR-approved centre located in Sector 14, Gurgaon. The clinic offers a full range of fertility services — from initial assessment to advanced treatments like IVF, IUI, ICSI, fertility preservation, and donor programs. With over 1,500 IVF cycles completed and a success rate above 65%, patients get expert care, an in-house embryology lab, and multi-specialist support, all under one roof.

Overview

Starting fertility treatment can feel overwhelming — there are many questions, some uncertainty, and a lot of options to choose from. Picking the right fertility clinic isn't just about success numbers; it also depends on having skilled specialists, correct diagnosis, a good lab, and a treatment plan made just for you.

Miracles Fertility & IVF Clinic in Sector 14 is a well-known fertility centre in Gurgaon. It offers several treatment options, including IVF, IUI, ICSI, fertility preservation, donor programs, and male infertility treatment. The clinic runs an ICMR-approved embryology lab and has a dedicated team of reproductive medicine experts to guide your treatment based on your specific condition.

Why Patients Choose Miracles Fertility & IVF Clinic, Gurgaon For Fertility Treatments?

Choosing a fertility clinic isn't only about success rates. Things like an experienced medical team, good diagnostic tools, a treatment plan built around you, and ongoing support during your fertility journey matter just as much. Miracles Fertility & IVF Clinic, Sector 14, Gurgaon, has been offering all of this together since 2013.

Here's what makes Miracles Fertility & IVF Clinic stand out:

- An ICMR-certified centre with a modern, fully equipped embryology lab for complex reproductive procedures
- IVF success rate of over 65%, backed by skilled specialists and advanced technology
- More than 1,500 IVF cycles completed so far
- A wide range of treatments — IVF, IUI, ICSI, blastocyst culture, assisted hatching, PGT, PESA, TESA, donor programs, and fertility preservation — all in one place
- A well-trained team of fertility specialists and embryologists with national and international certifications
- Treatment plans built around evidence-based medicine, with IVF recommended only when truly needed
- Transparent, honest IVF pricing with no hidden costs
- EMI payment options available
- Professional counselling support throughout your fertility journey
- Access to multi-specialty doctors for related health conditions

Fertility Treatments Offered at Our IVF Centre

Miracles Fertility & IVF Clinic offers a wide range of advanced fertility treatments, all available at Sector 14:

- **In Vitro Fertilization (IVF):** Eggs and sperm are fertilized in an ICMR-approved lab and the embryo is placed into the uterus — usually suggested for tougher infertility cases.
- **Intrauterine Insemination (IUI):** A simpler, more affordable option for mild or unexplained infertility.

- **Intracytoplasmic Sperm Injection (ICSI):** A single healthy sperm is directly injected into the egg — often used for severe male infertility.
- **Blastocyst Culture & Transfer:** Embryos are grown for 5 days before transfer to improve implantation chances.
- **Laser-Assisted Hatching:** A precise laser technique that helps the embryo implant — often recommended after failed IVF attempts or for older mothers.
- **Ovulation Induction & Cycle Monitoring:** For women with irregular ovulation, including those with PCOS.
- **PCOS-Related Infertility Treatment:** Hormone correction, ovulation support, and fertility planning.
- **Endometriosis & Tubal Infertility Management:** Both surgical and medical treatment options.
- **Low AMH & Poor Ovarian Reserve Treatment:** Stimulation plans tailored to each patient.
- **Recurrent IVF Failure & Recurrent Pregnancy Loss Care:** In-depth evaluation and a fresh treatment approach.
- **Donor Egg, Donor Sperm & Donor Embryo Cycles:** For couples who need donor material.
- **Egg Freezing & Fertility Preservation:** For medical reasons or personal family planning.
- **Sperm Freezing & Semen Cryopreservation**
- **PESA / TESA:** Surgical sperm retrieval for male infertility (azoospermia).
- **Pre-Implantation Genetic Testing (PGT):** Genetic screening of embryos before transfer.
- **Semen Analysis:** A detailed check of male fertility.
- **Pre-IVF Fertility Evaluation & Counselling:** Complete testing before starting treatment.
